Section 1: Agency Overview and Resources

1.1 Strategic Direction Statement

The Australian Government, through Cancer Australia, aims to provide national leadership in cancer control to improve patient outcomes and enhance health service delivery; guide improvements across the continuum of cancer care; and coordinate and liaise with a wide range of health care providers and groups in cancer care. Cancer Australia will also oversee a dedicated budget for cancer research, and provide policy advice to the Minister for Health.

As the Australian Government’s national cancer control agency, Cancer Australia works across all cancers, with a particular focus on breast, gynaecological (including ovarian) and lung cancers. Cancer Australia also focuses on populations which experience poorer health outcomes, including Aboriginal and Torres Strait Islander peoples and people living in rural and remote Australia.

The role and functions of Cancer Australia are set out in the Cancer Australia Act 2006. Cancer Australia is prescribed as a Statutory Agency under the Financial Management and Accountability Act 1997, and is also subject to the Public Service Act 1999 and the Auditor-General Act 1997.
1.2 Agency Resources

Table 1.2.1 shows the total resources from all origins. The table summarises how resources will be applied by outcome and by Departmental classifications.

All figures are GST exclusive.

¹ Appropriation Bill (No.1) 2012-13.
² Estimated adjusted balance carried from previous year for annual appropriations including cash at bank.
³ Includes an amount for the Departmental Capital Budget (refer to Table 3.2.5 for further details). For accounting purposes this amount has been designated as ‘contributions by owners’.
⁴ Appropriation Bill (No.1) 2012-13.
⁵ Cancer Australia does not have any special Accounts.

1.3 Budget Measures

Section 1.3 is not applicable to Cancer Australia in 2012-13.
Section 2: Outcomes and Planned Performance

2.1 Outcomes and Performance Information

Outcome 1 – Minimised impacts of cancer, including through national leadership in cancer control with targeted research, cancer service development, education and consumer support

Outcome Strategy

The Australian Government, through Cancer Australia, aims to minimise the impact of cancer by working in partnership with consumers, health professionals and the professional colleges, researchers and research funding bodies, non-government cancer and health organisations, other health portfolio agencies and governments to improve health outcomes for people affected by cancer.

While Australia has one of the highest survival rates in the world¹, cancer is the largest contributor to the burden of disease and injury in Australia, accounting for 19% of the total burden.² For the individuals affected, cancer can impact on every aspect of life, including long-term health and psychological wellbeing. Cancer Australia aims to reduce the impact of cancer through improvements in both the quality of cancer care people receive and their quality of life after diagnosis.

To achieve this, Cancer Australia translates worldwide research into evidence-based information to guide the work of health professionals in Australia and develops innovative models of care to improve health service delivery. In addition, Cancer Australia will: strengthen national data capacity; fund research in priority areas; assist in the implementation of policies and programs in cancer control; inform people with cancer about their diagnosis and treatment; and raise community awareness about the disease.

² Burden of disease is the years of healthy life lost through premature death or disability due to illness or injury. Eighty-three per cent of the cancer burden comes from the years of life lost due to premature death.
Cancer Australia Budgeted Expenses and Resources

Table 2.1.1 provides an overview of the total expenses for Cancer Australia by Program.

\(^1\) Departmental appropriation combines "Ordinary annual services (Appropriation Bill No 1)" and "Revenue from independent sources (s31)".

\(^2\) Expenses not requiring appropriation in the Budget year is made up of depreciation expense and amortisation expenses.
Program 1.1: Improved cancer control

Program Objectives

Provide leadership in health service delivery and clinical best practice

The Australian Government, through Cancer Australia, will continue to use the best available evidence to inform the delivery of cancer care. This includes the promotion of clinical best practice to health professionals and the development of new approaches to the delivery of care. In 2012-13, Cancer Australia will investigate the optimal model of care for lung cancer and promote better access to multidisciplinary care by fostering networks between cancer health professionals.

To ensure Australians diagnosed with cancer receive evidence-based care, Cancer Australia will continue to review and update clinical practice guidance materials in breast, gynaecological and lung cancer, and for the psychosocial care of adults with cancer. Cancer Australia will also support education initiatives for rural and regional health professionals, including Aboriginal Health Workers, caring for women with breast cancer.

Fund priority research and promote national data reporting

The Australian Government, through Cancer Australia’s Priority-driven Collaborative Cancer Research Scheme, will continue to partner with key non-government organisations to coordinate funding of cancer research in priority areas to maximise investment, with a focus on cancers with poorer outcomes. Cancer Australia will also continue to fund Australia’s existing National Multi-site Collaborative Cancer Clinical Trials Groups to increase the number of cancer clinical trials concepts and participation in clinical trials.

Cancer Australia will continue its work to promote a nationally consistent approach to data collection with the ongoing development of a specific dataset in prostate cancer in collaboration with Andrology Australia. In 2012-13, Cancer Australia will also work with the Australian Institute of Health and Welfare on comprehensive statistical overviews of cancer, including breast and gynaecological cancers and cancer in Aboriginal and Torres Strait Islander peoples, to inform practice, policy and health service planning.

Improve community access to cancer information

Through access to evidence-based information, Australians can proactively reduce their cancer risk and make informed decisions about their treatment and care when diagnosed with cancer. Through the Supporting people with cancer grant initiative, Cancer Australia will fund community organisations to develop information resources and support services for Australians diagnosed with cancer.

Cancer Australia will also develop evidence-based information on the symptoms of lung cancer to support early identification of symptoms and detection of the disease.

3.2 Budgeted Financial Statements

3.2.1 Differences in agency resourcing and financial statements
Section 3.2.1 is not applicable to Cancer Australia.

3.2.2 Analysis of budgeted financial statements

Departmental Resources
Cancer Australia will deliver a balanced budget in 2012-13. The Cancer Australia departmental appropriation has been reduced in 2012-13 to apply the one-off efficiency dividend announced in December 2011.

In 2012-13 Cancer Australia will continue to build in-house and specialist expertise and enhance the business operating model for the strengthened agency. This includes continuing a shared services arrangement with the National Health and Medical Research Council (NHMRC) for services including accommodation and support.

Administered Resources
Administered funding for existing Cancer Australia programs will continue in 2012-13. The level of administered funding across the forward years represents Government expenditure on programs delivered to all Australians through Cancer Australia.
